SUMMARY

Results-driven Data Analyst combining a Master's degree in International Luxury Management & Marketing (ISC Paris, Bac+5) with RNCP Level 6 Data Analyst certification (2026) and 8+ years across luxury retail and EMEA sales. At Marshall (Group: ~SEK 4 billion revenue), covered ~10 EMEA markets and key accounts Fnac, Boulanger and Cdiscount: variance analysis, root-cause analysis of stock-driven revenue gaps (85% of the initial gap closed) and a reporting cycle cut from 5 days to under 24 hours. Previously seven years advising an international luxury clientele at MERCI, exceeding a €50,000 monthly quota. Python, SQL, Power BI, AI-assisted workflows with human validation, GDPR knowledge. Trilingual: English, French, Hindi.

TECHNICAL SKILLS

Data & BI: Power BI (DAX, relational models) / Qlik Sense / Advanced Excel (Power Query, pivot tables) / Navision ERP

SQL & Python: SQL (SQLite, PostgreSQL) / Python (Pandas, Scikit-learn) / Statistical analysis (regression, K-Means)

Analytics: Variance and root-cause analysis / Forecast reconciliation / Out-of-stock reduction / KPI reporting / Data quality / GDPR / AI-assisted analysis (Claude)

PROFESSIONAL EXPERIENCE

EMEA Sales Coordinator | Marshall AB
Paris / Stockholm | 2022-2024 | Marshall Group: ~SEK 4 billion revenue, 90+ markets (2023)

Regional sales performance: Built the monthly KPI reporting in Qlik Sense and Excel for ~10 EMEA markets and key accounts Fnac, Boulanger and Cdiscount; tracked the French market (est. 10-15% of EMEA sales) with variance analysis against prior year and monthly targets.

Root-cause analysis: Investigated stock issues in Navision ERP and co-developed a plan to sell aged and refurbished stock in France, including stock sourced from other markets, that closed 85% of the initial revenue gap while preserving net margin.

Forecast reconciliation: Reconciled forecasts in Qlik Sense with actual warehouse availability to reduce out-of-stock situations and make distributor supply more reliable.

Reporting efficiency: Cut the monthly reporting cycle from 5 days to under 24 hours (-80%) by restructuring the Excel pivot-table process on Navision data and automating its repeatable steps; checked data before distribution, with Paris and Stockholm teams.

Client Consultant, Women's Fashion | MERCI Concept Store
Paris | 2015-2022

Revenue performance: Exceeded the individual €50,000 monthly sales quota on a continuing basis in a concept store generating ~€15 million a year, advising an international luxury clientele.

Purchasing behaviour: Segmented purchasing behaviour by brand to guide recommendations and drive repeat purchases; managed sales during peak periods (Paris Fashion Week, Design Week) and supported invitation-only events with major fashion houses.

DATA ANALYTICS & BUSINESS INTELLIGENCE PROJECTS

OpenClassrooms | 2025-2026

AI-assisted workflow: Claude assisted with KPI refinement, selected coding tasks and presentation drafting; I reviewed and adapted every output against project requirements.

Beverage Performance | Power BI, DAX, Excel
Problem: Fragmented sales, stock and promotion data. **Impact:** 5-table relational model and 5-page dashboard (margin, stock rotation, promotional ROI); 3 recommendations: renegotiate rising supplier prices, target high-margin products, clear dormant stock.

Sales & Inventory - BottleNeck | Python, Pandas
Problem: Inconsistent data across three files. **Impact:** Cleaned and merged 3 files (825 products); detected 31 price outliers (4.3%); compared Pearson vs Spearman correlation and K-Means vs DBSCAN clustering; documentation and GDPR review.

IT & Marketing - Sanitoral | Power BI
Problem: Limited project visibility. **Impact:** Views for 3 management profiles covering 6 IT phases and 4 Marketing phases.

Paris Real Estate | Python, Scikit-learn
Problem: Valuation and segmentation. **Impact:** Linear regression (R^2 = 0.98 on project data); K-Means segmentation of apartments and commercial premises.

CRM & GDPR | SQL, Power Query · SQL & Excel
CRM & GDPR: Anonymised CRM data after a CNIL sanction; 5 data-governance recommendations. **SQL & Excel:** Queries on insurance and NPS databases (joins, GROUP BY, HAVING); NBA data analysis and visualisation.

EDUCATION

Data Analyst, RNCP Level 6 | OpenClassrooms | 2025-2026 - Certified 30 September 2026.

Master's degree in International Luxury Management & Marketing (Bac+5) | ISC Paris | 2012-2014.

Bachelor's in French Language & Culture | University of Delhi | 2006-2010.
