KEY SKILLS

- Data analysis & interpretation
- International communication & collaboration
- Cross-functional project coordination
- Stakeholder communication & recommendations
- Analytical thinking & problem solving

LANGUAGES

- English — Fluent (C1)
- French — Fluent (C1)
- Hindi — Native (C2)

TECHNICAL SKILLS

- Python (Pandas)
- SQL (SQLite, PostgreSQL)
- Power BI (DAX)
- Power Query (ETL)
- Advanced Excel
- Qlik Sense
- Navision
- Data cleaning & transformation
- Exploratory data analysis
- KPI & reporting
- Data visualisation
- AI-assisted analytics (Claude, ChatGPT, Gemini, Perplexity)
- Prompt design

INTERESTS

- HYROX & running
- Meditation & neuroscience
- Travel & discovering new cultures
- Reading

Hina Yadav

DATA ANALYST | PYTHON • SQL • POWER BI • EXCEL

Results-driven Data Analyst with a Master's degree in International Luxury Management & Marketing (ISC Paris, Bac+5), RNCP Level 6 Data Analyst certification (2026) and 8+ years across luxury retail and EMEA sales. At Marshall (group of ~SEK 4 billion revenue): ~10 EMEA markets, key accounts Fnac, Boulanger and Cdiscount, 85% of a stock-driven revenue gap closed, reporting cycle cut from 5 days to under 24 hours. Seven years at MERCI exceeding a €50,000 monthly quota. Python, SQL, Power BI, AI-assisted workflows with human validation, GDPR. Trilingual: English, French, Hindi.

PROFESSIONAL EXPERIENCE

EMEA Sales Coordinator | 2022 – 2024
Marshall AB — Paris / Stockholm

- **Regional sales performance:** Built the monthly KPI reporting in Qlik Sense and Excel for ~10 EMEA markets and key accounts Fnac, Boulanger and Cdiscount; tracked the French market (est. 10-15% of EMEA sales) with variance analysis against prior year and monthly targets.
- **Root-cause analysis:** Investigated stock issues in Navision ERP and co-developed a plan to sell aged and refurbished stock in France, including stock sourced from other markets, that closed 85% of the initial revenue gap while preserving net margin.
- **Forecast reconciliation:** Reconciled forecasts in Qlik Sense with actual warehouse availability to reduce out-of-stock situations and make distributor supply more reliable.
- **Reporting efficiency:** Cut the monthly reporting cycle from 5 days to under 24 hours (-80%) by restructuring the Excel pivot-table process on Navision data and automating its repeatable steps; checked data before distribution, with Paris and Stockholm teams.

Client Consultant, Women's Fashion | 2015 – 2022
MERCI Concept Store — Paris

- **Revenue performance:** Exceeded the individual €50,000 monthly sales quota on a continuing basis in a concept store generating ~€15 million a year, advising an international luxury clientele.
- **Purchasing behaviour:** Segmented purchasing behaviour by brand to guide recommendations and drive repeat purchases; managed sales during peak periods (Paris Fashion Week, Design Week) and supported invitation-only events with major fashion houses.

DATA PROJECTS — OPENCLASSROOMS (2025 – 2026)

AI-assisted workflow: Claude for code and drafting; I defined the business questions, validated every output and made the final decisions.

- **Beverage business dashboard (Power BI):** five-table model (Finance, Sales, Promo, Web, Dates); DAX measures for margin, stock rotation, promotion ROI and month-over-month change; five pages ending in three concrete recommendations (renegotiate rising supplier prices, target promotions at high-margin products, clear dormant stock).
- **BottleNeck (Python):** audited and cleaned three stock and sales files (825 products) and merged them into one reliable table; detected price outliers (31 products, 4.3% of the catalogue); compared Pearson vs Spearman correlation and K-Means vs DBSCAN clustering; functional specification, documentation and GDPR review.
- **Sanitoral (Power BI):** project-tracking dashboard for IT (6 phases) and Marketing (4 phases) projects, tailored to three management profiles.
- **Paris real estate (Python):** property valuation with linear regression (R^2 = 0.98) and K-Means clustering separating apartments from commercial premises by price per m^2.
- **CRM & GDPR (Power Query, SQL):** GDPR-compliant anonymisation of a CRM database after a CNIL sanction; five data-governance recommendations.
- **SQL & Excel:** advanced queries on home-insurance and customer-satisfaction (NPS) databases; Excel analysis and visualisation of NBA data.

EDUCATION

Business Intelligence Analyst — Data Analyst title, RNCP 6 | 2025 – 2026
OpenClassrooms

- Certified 30 September 2026. Business needs analysis, SQL and relational data modelling, ETL and data cleaning with Python (Pandas) and Power Query, Power BI dashboards and KPI definition.
